

## Professional Summary

With over 10 years of experience, I have transitioned from a Junior to a Senior Printing Designer, leading a team and implementing Adobe solutions comprehensively. Later, I leveraged my design skills to excel as a Developer, specializing in frontend and backend development for apps, websites, and website stores, along with server management. Currently, as a Senior Developer, I manage cross-functional projects, overseeing content publication, marketing, and the development of online academies.

I thrive on being an active contributor to my team and enjoy generating and executing new ideas.
